

Individual career planning and development, exciting challenges and a lot of room for creativity: This makes the working environment at the TÜV NORD GROUP special and allows us to provide excellent solutions for people, technology and the environment in more than 70 countries throughout the world. We act responsibly, combine sustainability, innovation and cooperativeness and appreciate diversity as a source of inspiration within our company. Come and join our team!

## We make the World safer.

The DMT GmbH & Co. KG is part of the TÜV NORD group and provides international Engineering- and Test services to the following sectors of Mining and Deposit Reconnaissance, Coking Technology, Civil Engineering, Mechanical and Systems Engineering as well as Product- and Building safety. In addition, the company develops and builds Measurement systems, including the production of Inspection- and Test products for various Industries.

At DMT GmbH & Co. KG, based at our location in **Nottingham or Essen**, we are currently seeking to fill the following position:

## Project Engineer for Electrical/ Mechanical Mining Consulting Services m/f/d

### This is what you can expect

- Contribute to electrical/mechanical tasks related to international surface/underground mining consulting projects
- Management of pre-commissioning and commissioning activities
- Manage the selection, dimensioning and specification of mining equipment and/or electrical equipment including power supply and infrastructure
- Assess the maintenance status of mining equipment/electrical equipment and asset valuation
- Coordinate with other disciplines during the design process
- Assist in managing all aspects of a project from scoping, due diligence, prefeasibility, and feasibility to execution, including construction and commissioning
- Work with project teams and individual engineers to ensure projects are completed within allotted schedules and budgets
- Forecasting and management of costs for projects
- Develop project brief, strategy and scope of work
- Project Budgeting and cost control

### This is what we expect

- Degree (B. Sc., B. Eng., M. Sc. or M. Eng.) with a focus on electrical/mechanical mining engineering or equivalent
- Professional engineering accreditation (or eligibility for registration) with an internationally recognised engineering institute or association, CEng, PEng or equivalent
- At least 7+ years of experience in mining operations or mining consulting as well as experience in leading international mining projects
- Proven track record in electrical/mechanical engineering as well as in open-pit and/or underground mining
- Ability to work independently
- Strong communication skills in English (business language) as well as at least one additional language (e. g. German and French or Spanish or Russian)
- Proficiency with MS Office
- Confident demeanour and good organisational abilities along with a customer oriented, reliable working style, also under tight deadlines
- Business acumen (sales skills, proposal preparation) and team player mentality
- Willingness to travel to project locations and customers world wide

### **Why you should choose us**

- Competitive benefits and remuneration packages
- Work in intercultural, motivated project team
- Support our employees in their personal and professional advancement with a wide range of internal seminars and our management development program
- Widen your expertise in a modern work environment
- Innovative and collaborative multidisciplinary projects
- International projects and travel opportunities

### **Interested?**

We look forward to receiving your application, indicating your salary expectations and earliest possible start date. Please apply online via the "apply online" button. The TÜV NORD GROUP is committed to diversity and equal opportunities for all, regardless of age, gender, disability, religion, ethnic or social background or sexual orientation.
